

Duarte Leitão

SOFTWARE ENGINEER

Barcelos, Braga

 (+351) 939 761 195  duarte0903@gmail.com  Duarte0903  Duarte Leitão

Summary

Technology consultant at Deloitte and Computer Engineering Master's student at the University of Minho, delivering platform implementations and legacy-to-cloud migrations for clients in the insurance sector. Progressed from trainee to consultant within a year, contributing across the full delivery cycle from requirements gathering through implementation, testing and production support. Brings team leadership and stakeholder management experience from a senior role at FSUMinho, coordinating operations across departments and owning sponsor relations for a national Formula Student team.

Technical Projects

Claimguard - Claims Fraud Detection

Braga, Portugal

MSC THESIS - UNIVERSITY OF MINHO, IN PARTNERSHIP WITH DELOITTE

Nov 2025 - Oct 2026

- Multi-agent architecture for detecting fraud in insurance claims, built on Google ADK and the A2A protocol
- Router agent dispatches claims to ten specialised sub-agents, from vision forensics to policy verification
- Retrieval-augmented analysis of historical claims, with an auditor dashboard for reviewing investigation reports
- **Stack:** Python, Google ADK, Gemini, Vertex AI, React

Ascend

 Duarte0903/Ascend

PERSONAL PROJECT

Aug 2026 - Present

- Native macOS app that tracks net worth from periodic balance snapshots rather than transactions
- Dashboard, trend and allocation views, goal tracking and multi-year projections
- Layered architecture keeping the calculation engine free of any UI or persistence dependency
- **Stack:** Swift, SwiftUI, SwiftData

Strava Toolkit

 Duarte0903/strava_toolkit

PERSONAL PROJECT

Jul 2026 - Aug 2026

- Converts Samsung Health workout exports into TCX and GPX files for upload to Strava
- Normalises two different undocumented export layouts behind a single interface
- Desktop app, command-line converters and a native iOS client, covered by unit tests
- **Stack:** Python, Tkinter, Swift

MKTS Terminal

 Duarte0903/mkts_terminal

PERSONAL PROJECT

Apr 2026

- Keyboard-driven terminal dashboard for tracking equities, charts and market news
- Side-by-side ticker comparison on normalised return charts
- Macro news aggregator that deduplicates headlines across major indices
- **Stack:** Python, Textual, yfinance

FSUMinho Website

 FSUMinho/website_v2

FSUMINHO

Jul 2024 - Present

- Public team website with a contact form and multilingual content
- Responsive layout with continuous deployment to GitHub Pages
- **Stack:** React, Vite, i18next, GitHub Pages
